

WATER PROJECT IN THE COMMUNE GANGURA

The water project was implemented in the commune Gangura in 2012. With this project the population of the commune was supplied with good drinking water.

Children are happy about clean drinking water.

Girls and boys from the day care centers for children BUNVOLENTIA Gangura I and BUNVOLENTIA Gangura II work on the land by the artesian well and water tower. They cultivate different vegetables and herbs that are used in the kitchen, as well as flowers and trees.
