

HEATING MATERIAL FOR THE NEEDIEST FAMILIES OF GRIGORAUCA

Poverty in Moldova, exacerbated by the economic crisis because of pandemic and therefore soaring prices for food, household goods and services, is leaving people freezing with insufficient finance for heating material. Large families with very low income and often lonely elderly who have to survive on their meager pensions are particularly affected by this situation. The organizations „Hilfswerk Liechtenstein e.V.” (Liechtenstein) and „Menschen Helfen e.V.”, President Dr. Robert Roithmeier (Germany), helped in time - as always. The 47 neediest families and seniors received enough firewood and coal to get through the winter. All beneficiaries are very grateful for this help.
